# Priorities and Plans for the First FPSC Calls for Research Proposals

- FPSC is seeking funding for research.
- Expect to launch a call later this year.
- Will be modelled on the Center for Produce Safety calls.
- Need to identify research priorities – you can help.

# Help us Identify Research Priorities

- You each have 8 red dots.
- Stick the red dots on those research questions you think are a high priority.
- You can put all the dots on one question, or spread them among questions.
- What are the priorities?

## The FPSC Calls for Research

- FPSC aims to have a single call for research per year.
- Research priorities set by the FPSC Board and be industry-supported and industry-focused.
- Short call period.
- Will seek to integrate call with the HAL process to gain matching funding.

## The FPSC Calls for Research

- FPSC Technical Committee will advise the FPSC Board on research priorities and evaluate research proposals.
- Applications for membership of the FPSC Technical Committee closed 1 August 2014.
- Board will be deciding Technical Committee this week.

# THANK YOU
